PROFILE SUMMARY

Completed an M.Sc. in IT with a specialization in Mobile App and UI Development, focused on creating intuitive and user-centered UI/UX designs. Skilled in Figma, Flutter, HTML, CSS, JavaScript, and PHP, with experience in responsive design and user flow optimization. Designed projects including a digital healthcare system and a travel application, emphasizing usability and seamless interaction. Seeking a UI/UX internship to apply design thinking and build impactful digital experiences.

SKILLS

- UI/UX
- Dart
- iOS
- Flutter
- HTML, CSS, JS, Bootstrap
- Java

EXPERIENCE

UI/UX Designer Intern, Infotact Solutions

- Designed user-friendly interfaces and prototypes using Figma.
- Created wireframes, user flows, and high-fidelity UI designs for Healthcare and Travel applications.
- Collaborated with team members to improve usability and user experience.
- Delivered responsive and visually appealing designs aligned with project requirements.

PROJECTS

1. Digital Healthcare System (UI/UX Design)

- Overview : Designed and developed a digital healthcare platform to improve patient experience and accessibility to medical services.
- Key Features : User registration and login, doctor appointment booking, digital health records management, user-friendly dashboard, responsive and intuitive interface.
- Technologies Used : Figma
- Outcome: Strengthened UI/UX and full-stack development skills by building a healthcare solution focused on usability, accessibility, and patient engagement.

2.Travel & Trip Management System (UI/UX Design)

- Overview : Developed a travel planning and booking application that enables users to efficiently organize and manage trips.
- Key Features : Trip creation and itinerary management, booking system for flights and hotels, real-time updates, interactive and responsive interface, user collaboration features.
- Technologies Used : Figma
- Outcome: Enhanced problem-solving and design thinking skills by creating a complete travel management system with seamless user experience and backend integration.
